

### **Basic Configuration:**

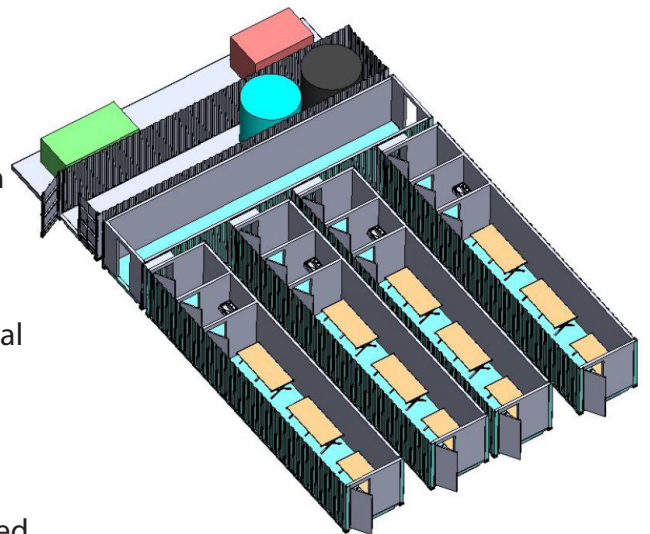

These prefabricated, dynamic Mobile Triage Units can be assembled inside or outside large facilities. All units include electrical systems powered by diesel generators and shore connections, ventilation with HEPA filters, and potable water/waste connections.

### **Additional Design Features:**

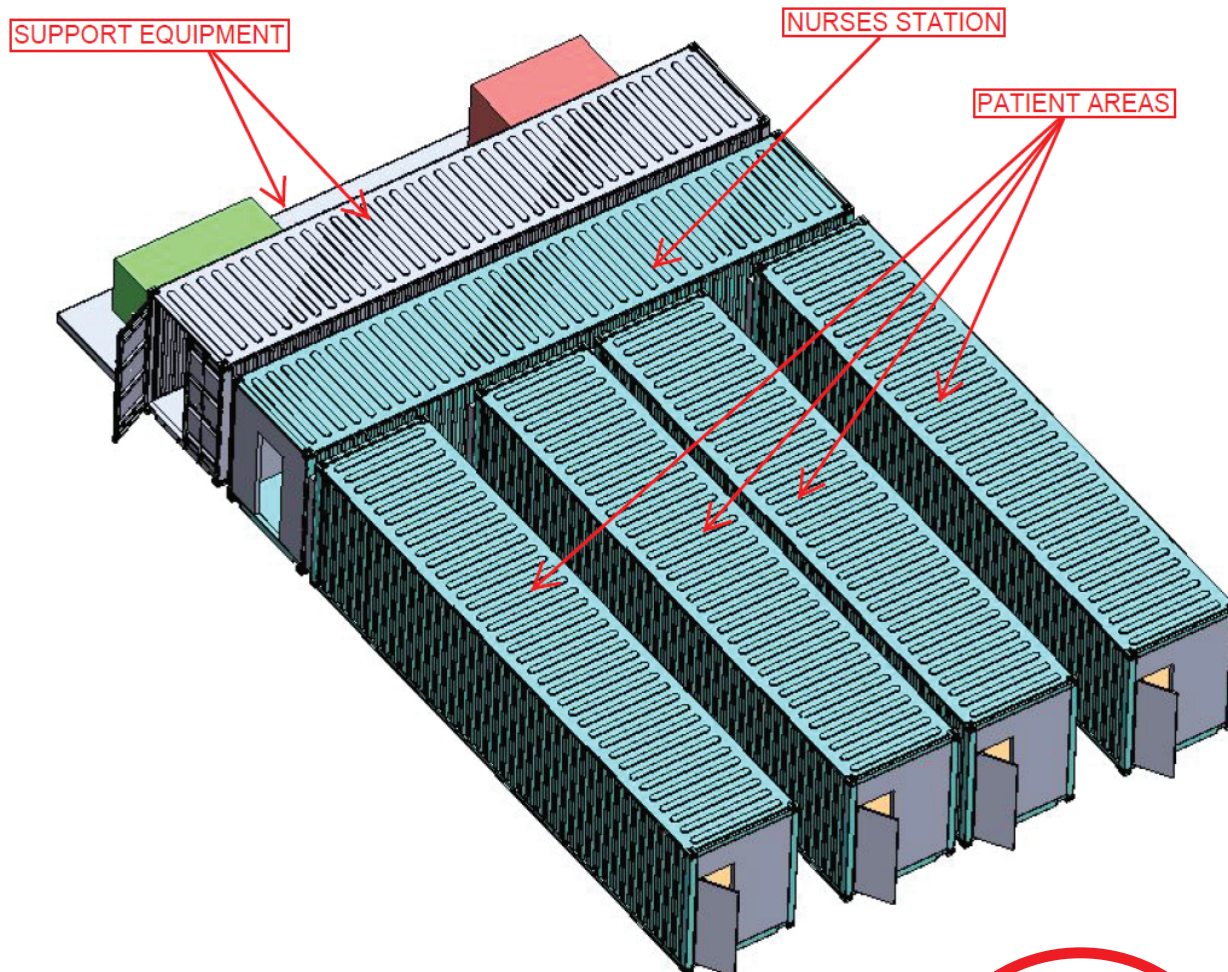

Optional design features include medical gas lines and storage, general waste storage, medical waste storage, soiled linen storage, and an additional diesel fuel cell.

### **Optional Configuration:**

Portable showers, bathrooms, and laundry services can also be installed for long-term occupation.

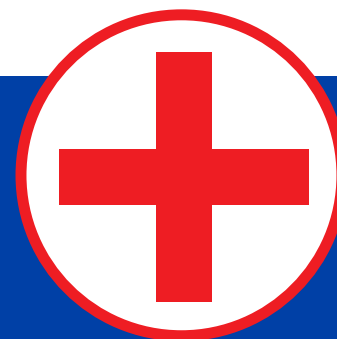

# Mobile Triage Unit BIO CONTAINMENT
